Portfolio: [Live Portfolio](#) | [GitHub Repository](#)

PROFESSIONAL SUMMARY

Software Engineering undergraduate (5th semester, CGPA 3.40/4.00) focused on .NET full-stack development and AI-enabled applications. Built and deployed Quantum Count, a complete inventory and operations application using C#/.NET 10, Blazor Interactive Server, ASP.NET Core, Entity Framework Core, SQL Server, ASP.NET Core Identity, REST APIs and MudBlazor. Also developed Task Flow, a responsive productivity dashboard, and Flask-based AI/ML applications. Strong foundation in C#, OOP, DSA, SQL, REST APIs, Git/GitHub and software engineering practices, with hands-on coursework in full-stack integration, DevOps and AI application development.

TECHNICAL SKILLS

Languages: C#, C++, Python, SQL, JavaScript, HTML5, CSS3

Microsoft / .NET: .NET 10, ASP.NET Core, Blazor Interactive Server, Entity Framework Core, ASP.NET Core Identity, REST APIs, C#

Web / UI: Blazor, MudBlazor, Responsive Web Design, Bootstrap

Databases: SQL Server, SQLite, Relational Database Design, EF Core Migrations

AI / ML: Python, Flask, NumPy, Pandas, Scikit-learn, Machine Learning Pipelines, Model Evaluation, AI Application Development

ML Methods: Linear Regression, Logistic Regression, Decision Trees, Random Forest, Naive Bayes, Feature Engineering.

Tools / Practices: Git, GitHub, Visual Studio, VS Code, Linux, Bash/Shell, Agile, OOP, DSA, Debugging, API Integration, Postman, Monster Asp.Net

SELECTED PROJECTS

QUANTUM COUNT — Full-Stack Inventory & Operations Platform

Tech: C# / .NET 10 / Blazor Interactive Server / ASP.NET Core / EF Core / SQL Server / Identity / REST APIs / MudBlazor

- Built and deployed a complete full-stack business application with inventory, equipment, projects/tasks, procurement, suppliers, reporting, staff/roles, settings and AI-assistant functionality.
- Implemented data access and persistence with Entity Framework Core and SQL Server, including migrations, schema work and dashboard data binding.
- Implemented authentication/authorization with ASP.NET Core Identity and integrated API/security configuration; resolved deployment, authentication and environment-configuration issues.
- Connected business workflows across procurement, inventory, project materials, equipment assignment/history and reporting/export.

[Live Demo](#) | [GitHub Repository](#)

TASK FLOW — Productivity Dashboard

Tech: Blazor / HTML5 / CSS3 / JavaScript

- Designed a responsive productivity dashboard with reusable UI components, navigation, task-oriented views and modern visual styling.
- Structured the interface for maintainability and reusable components while practicing Blazor component development and responsive web design.

[GitHub Repository](#)

AI / ML & Flask Applications

[Rain Predictor](#) | [Titanic Survival](#) | [Credit Card Fraud Detection](#)

Tech: Python / Flask / NumPy / Pandas / Scikit-learn

- Developed ML projects including Rain Prediction, Credit Card Fraud Detection and Titanic Survival Prediction using preprocessing, feature engineering, model training, comparison and evaluation.
- Built Flask applications for AI/web integration, including an emotion-detection application and CRUD-based web applications.

EDUCATION

BS Software Engineering — University of Agriculture Faisalabad | 5th Semester | CGPA: 3.40/4.00

Intermediate BISE BWP --- Punjab College Sadiqabad | 928/1200

Matriculation BISE BWP --- Bismillah Higher Secondary School | 981/1100

CERTIFICATIONS

- IBM Applied Software Engineering Fundamentals (Specialization)
- IBM Machine Learning with Python
- MICROSOFT FULL-STACK INTEGRATION
- GOOGLE AI ESSENTIALS (Specialization)
- MICROSOFT Blazor for Frontend Development
- MICROSOFT Backend Development with .NET
- HP LIFE AI for Beginners
- HP LIFE Data Science and Analytics

RELEVANT COURSEWORK & PROGRESS

- Microsoft Full Stack Developer coursework — completed through Full Stack Integration
- IBM DevOps & Software Engineering coursework — ongoing; completed substantial modules
- LeetCode DSA coursework — ongoing; 115+ problems solved

ACHIEVEMENTS

- 115+ LeetCode problems solved
- Public GitHub portfolio with active software-development projects
- First complete full-stack application deployed publicly (Quantum Count)
